WORK EXPERIENCE

Arcade

San Francisco, CA

Product and GTM Lead, Chief of Staff

June 2025 – Present

- Series A startup backed by Forerunner, Reid Hoffman, building the first AI physical product creation platform and marketplace
- Reporting directly to CEO Mariam Naficy, driving 0-to-1 patented product development and GTM across consumer and enterprise segments. Within first 10 days at the company, presented PMF efforts during July board meeting
- Shipped Arcade's conversational AI design agent across home décor and jewelry: authored and iterated core system prompts, designed agent architecture and evaluation framework, built datasets and success metrics, and led instrumentation for quality and usage. Owned agent GTM narrative, writing all launch copy, press materials, and social media campaign design; coordinated PR outreach; organized influencer dinner and press launch in New York; and executed holiday growth experiments and brand activations, including an Arcade Twitter agent (@ArcadeAssistant) and LED trucks driving around New York
- Lead recruiting and top talent acquisition, building repeatable hiring pipelines through Greylock Techfair and university programs; designed outreach strategy, job descriptions, interviews, and a scalable recruiting process to support rapid team growth
- Built Arcade's enterprise outbound and forward deployed motion (artist foundation models) from zero: designed the sales playbooks and outreach sequences that sourced the company's early customers, and generated \$1M+ in qualified pipeline

CHAIWALA

San Francisco, CA

Founder

April 2026 – Present

- Produced a South Asian teahouse cafe popup series with 3 friends. End-to-end branding and interior decoration, recipe development, operations, and event management. Initial popup at Stanford garnered 300+ attendees and sold out of all menu items through word of mouth (@stanfordchaiwala on Instagram)

Apple

New York, NY

Product Manager

March 2025 – June 2025

- Led design and specification of the first official SDK for the Apple Ads Campaign Management API, a core App Store Ads infrastructure project impacting \$1B+ in API-driven ad spend across 15,000+ advertising clients globally
- Fully owned the product lifecycle, from opportunity sizing and user segmentation to product requirements document (PRD) authorship, cross-functional alignment, client interviews, and feature planning for general availability (GA) launch

AutoZone

Memphis, TN

Corporate Strategy

June 2024 – August 2024

- Presented dynamic pricing model for AutoZone's commercial business to C-suite, which secured \$XXXK funding and approval for pilot implementation and A/B testing across 5+ product categories for all business customers
- Conducted user research, competitive analysis, and clickthrough drop-off analysis, culminating in a retrieval-augmented generation (RAG) AI strategy and PRD presented to SVPs to increase e-commerce product visibility and customer attraction

Glean

Palo Alto, CA

Software Engineer

June 2023 – August 2023

- During Series C inflection point as the company shifted focus from enterprise search to enterprise AI, contributing to early experiments for Glean Chat / Assistant, including creating ChatGPT plugin prototypes to query enterprise apps and data
- Built products to support contextual understanding and intent across knowledge, gaining insight on architectural challenges of federated search and complexities of layering LLMs onto legacy enterprise systems

St. Jude Children's Research Hospital

Memphis, TN

Research

June 2021 – August 2021

- Enhanced early-stage cancer detection by developing and optimizing scMINER, a R package developed in Python for single-cell RNA sequence data analysis, resulting in a 15% increase in efficiency as tracked by processing time

University of Memphis

Memphis, TN

Research

August 2019 – April 2021

- Spearheaded data-driven research on phytochemicals as a non-invasive solution for early-stage cancer progression and published in leading journals as first and co-author (Journal of Cancer, International Journal of Molecular Sciences) with 200+ citations
